

An MRI so comfortable...

For your comfort and peace of mind, we have installed the latest state-of-the-art MRI equipment.

Designed for ultimate comfort and exceptional quality, the MSK Extreme allows you to relax in a reclining chair while your hand, arm, elbow, foot, leg or ankle is quietly scanned.

Your doctor will love the high-quality images that rival those produced by a large, full-body system. You'll love the comfort and speed.

When your doctor orders an extremity MRI, ask for us. You'll be so comfortable, you may even forget you're having an MRI.

...You May
Forget
You're
Having
One.
